Your clients deserve the best so why settle for an IgG estimate when you can have a true quantitative result in just minutes? The **DVM Rapid Multi-Test Analyzer** will run serum or colostrum IgG at the patient side with just a few simple steps. Test results are maintained onboard for later recall and at less than 15.00 per test it's affordable, too.

The companion **DVM Sperm Concentration Analyzer** delivers proven results for a variety of species including equine\*, bovine, porcine, and canine. Each test takes less than a minute to process at an economical cost of less than 2.00/test. Note: Equine Sperm Concentration can also be run on the DVM Rapid Multi-Analyzer.
