----------------------	---------------------------------	-------

An exceptional teaching tool, our wide selection of fixed slide specimens include intestinal parasites, protozoa, hemoparasites, ectoparasites, and fungi. In addition, our fixed parasite suspensions can be used to create challenging "wet" slide preparations resembling clinical samples ideal for testing. Should you require a specimen that does not appear please contact us for availability. *Please note: Our inventory of specimens used to manufacture these products changes with demand and all species may not be available at all times. We also reserve the right to limit quantities for specimens in short supply. We purchase fresh, high burden specimens of all types. Please call for details.
